CONTRACTOR:	NTL Electrical Services Ltd
SECTOR:	Shows & Exhibitions

Driffield Show - The UK's Largest One Day Show

About the project

NTL Electrical has been supplying power and lighting services for Driffield Agricultural Show since 2006 and over this time have seen the show grow dramatically. Every year the Society looks to improve the content and quality of the Show to ensure it retains the prestigious reputation that it has gained. The Show boasts Main Ring Entertainment, Countryside Pursuits Area, Horticulture Exhibits, Equestrian Trials, Forestry and Renewable energy demonstrations, whilst the Livestock Section continues to be the events crown jewel attracting an extremely high calibre of exhibits. Last year's attendance exceeded 30000 people making the event the largest one day agricultural Show in the UK.

Project challenges

Driffield Show is slightly unusual in that a small proportion (5%) of the power required to meet the events demands is taken directly from a fixed supply located in the Showground plant room. This supply is used for event control and critical services. In addition to the fixed power 7 generators of various sizes from 60 to 250Kva are utilised along with over 1Km of three phase cabling, 8Km of single phase cabling to supply all manner of trade stands, caterers and exhibitors.

"On every occasion that I have worked with NTL I have found their approach to be professional, helpful and accommodating. They are sensitive to the requirements of the Society and the traders throughout the build up and open day. They deal with any unexpected situations effectively and efficiently. They are extremely approachable and work well alongside the Driffield Show staff."

"I have no hesitation in recommending NTL Electrical Services Ltd"

David Tite - Showground Secretary - Driffield Society
