HERCMA Northern Trade Show - Europe's Largest Caravan Trade Show

About the project

HERCMA Northern Trade Show is staged at The Lawns Cottingham. The event is Europe’s largest caravan trade show and generally features more than 120 new touring caravans and about 180 caravan holiday-homes, lodges and park homes from most of the major British manufacturers. The show attracts about 3,500 trade visitors from throughout the UK, and Europe. The annual Caravan Extravaganza gives enthusiasts their first opportunity to see the new season’s models.

Project challenges

NTL have been supplying power to both the Northern and Southern Trade Shows for the last 5 years. Our project manager and a team of six electricians transformed both venues consecutively from quiet green field site’s into a bustling professional trade exhibition. Over a 10 day period we installed over 12Km of cable and 100 distribution boards to supply power to supply each individual holiday home and service over 60 trade stands. The event runs for 7 consecutive days to serve both the public and professional traders needs. Due to the duration of the event power is secured by installing generators in pairs (Duty & Standby) controlled by mains failure panels. In the event that a duty generator fails the standby generator is starts automatically to ensure power is maintained.

Services

Mains Power Distribution	✓
Small Power	✓
Lighting Installation	✓
Emergency Lighting Installation
