## Tribfest - The Worlds Biggest Tribute Band Festival

### About the project

Tribfest is the UK's largest tribute music festival held within the grounds of Beverley Polo Club. The idea of Tribfest is to enable families and revellers to enjoy a fantastic, fun weekend away whilst listening to some great live music.

ACTS signed up for this year's Tribfest include:

Claptonmania, Lady Gaa Gaa, Kazabian, The Jilted Generation (The Prodigy), Radio Clash, Achtung Baby (U2), The Beautiful Couch, Ultimate Elton, BlondieUK, Kings ov Leon, The Black Eyed PeaZ, Back For Good (Take That), Stereophonies, Ayn Skynryd, Antarctic Monkeys, Hot Red Chilli Peppers, Born To Be Jovi, Badness.

### Project challenges

The venue is a green field site spread over 110 acres of countryside, plant movement and the lack of hard standing roadway has proved to be a challenge in previous years particularly with the reliable British summertime. We serviced the entire sites electrical requirements including two stages, various bars and numerous food and trade concessions using 8 super silenced generators. Power for the main sound and lighting was supplied via a pair of 250Kva synchronised generators both capable of taking the stage's maximum demand in the event of a generator breakdown providing secure power for the main entertainment. We also ensured that the site was suitably illuminated supplying and installing marquee lighting, walkway lighting and tower lighting.

### Services

Mains Power Distribution	✓
Small Power	✓
Lighting Installation	✓
Emergency Lighting Installation	
Electrical Maintenance	✓
Electrical Heating Installation	
Fire Alarm Installation	
Intruder Alarm Installation	
Ventilation Installation	
Data / Structured Cabling	
Energy Efficiency Scheme / Upgrade	

*"The lads at ground level do a brilliant job with no fuss; it's a tricky job to turn around with multiple areas requiring servicing at the same time through the event build up. Illuminating the site is a big enough job without considering all the power distribution. With NTL on board I don't have to worry about any site power and concentrate on artists and performers"*

Ed Faulkner - Managing Director - Ed Entertainments Ltd
